FOREWORD

The Military Air Traffic Activity Reports prepared as a document for Federal Aviation Administration personnel who have an operational interest in activity generated at military installations. The data presented in the tabulations were compiled from the following sources:

1. **AIR FORCE** — USAF Air Traffic Control — Summary of Quarterly Air Traffic Control Reports, Department of the Air Force, Headquarters, Air Force Communications.
2. **ARMY** — Summary of Air Traffic Activity Count, Department of the Army, U.S. Army Aeronautical Service Office.
3. **NAVY** — Air Traffic Activity Reports (OPNAV Form 3721/12) submitted by U.S. Naval Aeronautical Facilities.

Every attempt has been made to achieve a high degree of comparability in the activity data presented for the three branches of the Department of Defense. Users of this publication must exercise care, however, when combining the figures of the three military departments to obtain overall totals for military air traffic activity due to differences in the definitions of terms used by each of the departments.

Suggestions from users for improving either the scope, presentation, or utility of this report are invited. It will also be appreciated if discrepancies and errors in the data are called to the attention of the Information and Statistics Division of the Office of Management Systems.

The Glossary has been furnished to provide users of this report with the current definitions of terms used by the Air Force, Army, and Navy. For additional definitions of terms used by the Federal Aviation Administration, see "FAA Air Traffic Activity, Calendar Year 1975."

This report was prepared in the Office of Management Systems, Information and Statistics Division, Information and Service Branch, by Betty V. Cayce
